ENTERPRISE TRACK A · PROJECT UDYAM DIGITAL

Udyam Saathi

From **“hello”** to **“live”** in one sitting: a GenAI advisor, a one-screen quote, 2-minute Smart KYC and a self-serve tracker for India’s small businesses.

Rishi Raj & Uttam Singh
Delhi Technological University (DTU)

THE PROBLEM · WHAT LAST QUARTER'S 5,000 LEADS TELL US

Only 7.4% of SMB leads go live. The leaks are visits, quotes and silence, not demand.

Funnel, Apr–Jun 2026

17.6 days lead→live · 3 status chases per customer · ₹15,053 blended CAC

827
dropped before any quote because the owner had no time for a visit, or sales never scheduled it

1,006
dropped at the quote: price too high (414), competitor cheaper (207), quote too complex (206), too slow (179)

273
lost in paperwork: missing GST/Udyam docs, mismatches, no signatory, "too long"

Field sales costs 6× more per activation

Field sales	**₹24,335**
Channel partner	**₹20,851**
Website · Inbound	**₹6,352 · ₹5,113**
Referral	**₹4,099** at 14.8% conv.

Silence after purchase drives churn

Customers who chased status ≤1 time: **5.9% churn, NPS −3**. More than 4 chases: **27.9% churn, NPS −63**.

GST is the gate

Activation **9.6%** with a GSTIN vs **2.0%** without. 29% of leads have none.

WHO FIRST · WHAT BUNDLE · WHAT PRICE

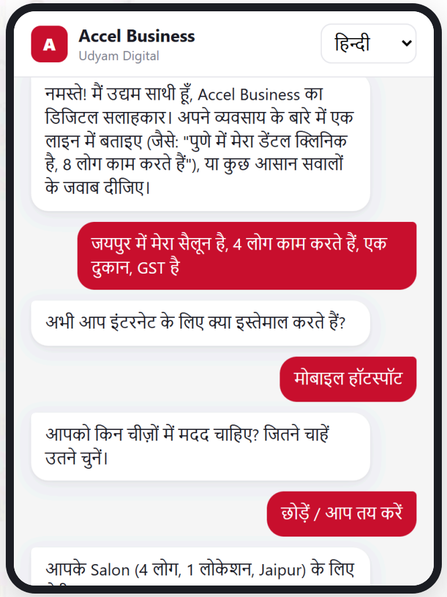

Lead with professional offices, go digital-only for micro, assist multi-site

SEGMENT (SHARE)	WHY THIS ORDER (Q1 DATA)	LAUNCH BUNDLE (ADVISOR DEFAULT)	PRICE / MONTH*	JOURNEY
① Priority **Professional offices** (25%) clinic · CA · coaching	Best economics: **11.1% activation, ₹10.7k CAC vs ₹6.8k bundle** → payback < 2 months; churn 13.8%	**"Pro Office"**: Biz Fibre 300 · 2 Postpaid 599 · Cloud Email per user · Endpoint Security · 1 TB Cloud Backup (+ backup link, SMS reminders, IVR as add-ons)	**₹6,339** (12 m) **₹4,889** (36 m) 8-staff clinic, ₹0 setup	100% digital, advisor + Smart KYC; partner only installs
② Volume **Micro retail & services** (55%)	Largest base, but **4.1% activation, ₹20k CAC vs ₹2.5k bundle** → only works with near-zero-touch acquisition	**"Dukaan Starter"**: Biz Fibre 100 · Cloud POS & UPI billing · 1 Postpaid 299 (5G AirFiber if no fibre; WhatsApp API unlocks with GST)	**₹2,497** (12 m) **₹1,897** (36 m) kept ≤ ₹2,500	Digital-only, WhatsApp/voice entry, regional language, GST-light path
③ Value **Small multi-site** (15%)	Highest value: **₹31k/month**, lowest churn 10.8%, but longest install (18.8 d)	**"One-Bill Chain"**: Fibre 300 + 4G/5G failover per site · POS per outlet · CCTV · Postpaid per manager (SD-WAN at 3+ sites and 10+ staff)	**₹23,470** (12 m) 5 outlets; ₹17,970 at 36 m	Advisor quote → field sales closes (high value)
④ Niche **Small manufacturers** (5%)	Strong conversion (12.8%) but complex site surveys; worst NPS (−46)	**"Factory Connect"**: Leased Line 20 (SLA) · Managed Firewall · Machine IoT kit · Postpaid 599 · Endpoint Security	**₹22,327** (12 m) 40-worker unit	Field-led, advisor for pre-qualification

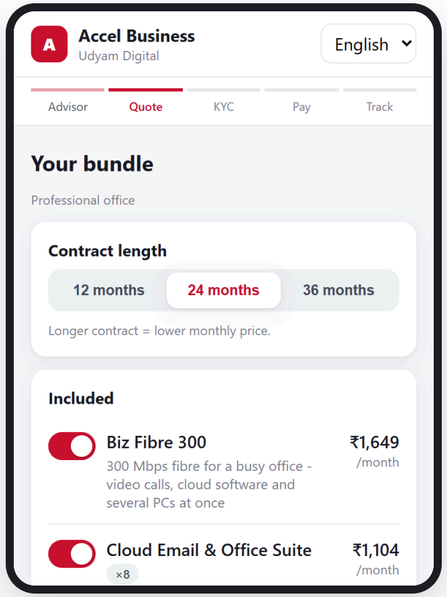

*Prices come from the live prototype's rules engine on the provided catalogue: 12-month contracts at the top of each price range, 24 months mid-range, 36 months the floor with setup 50% off. Every bundle is checked against city tier, minimum staff and sites, GSTIN requirement and product dependencies before it is shown.

THE WORKING PROTOTYPE

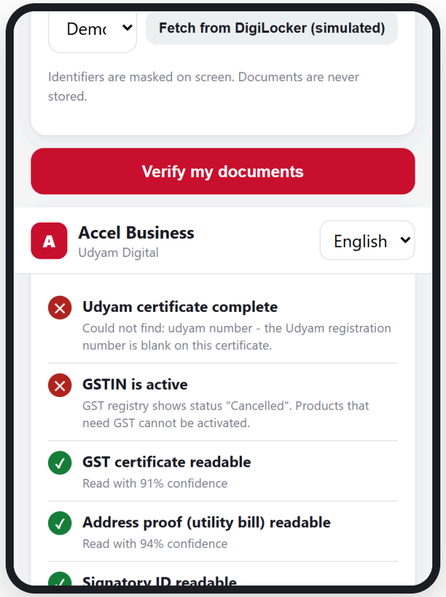

Five screens replace a visit, a PDF quote, a paper file and 3 calls

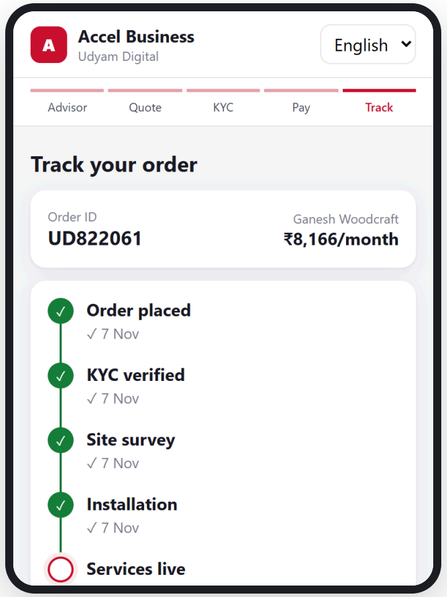

1 · Advisor
Hindi, Marathi, Tamil, English, voice. One sentence fills 5 answers

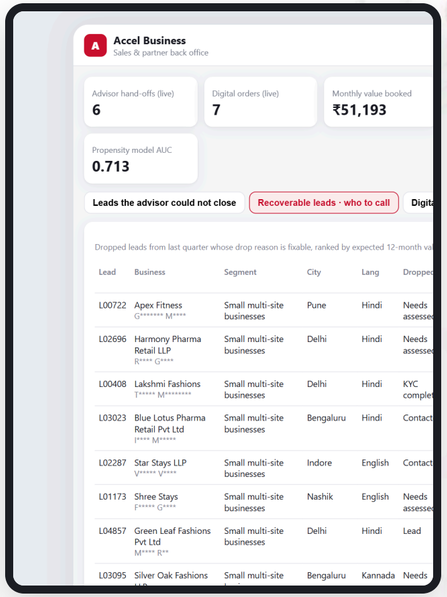

2 · Quote & checkout
One monthly price + GST, toggle add-ons, 12/24/36 m

3 · Smart KYC
Consent → photo OCR → GSTIN/Udyam lookup → 14 checks

4 · Tracker
Live stages, per-product ETA, WhatsApp updates

5 · Partner back office
Hand-offs + propensity-ranked call list

10/10 advisor test scenarios pass
tier, staff, sites, GSTIN and dependency rules, in 4 languages

8 of 12 specimen applicants flagged
cancelled GSTIN, blank Udyam no., blurred cert, GSTIN typo, name mismatch, 257-day-old bill, “Owner” signing for an LLP

GenAI is guard-railed
Claude Opus 5.5 understands free text in any language; a deterministic rules engine decides what can be sold

Works with no AI key
a rule-based multilingual parser takes over, so a live demo can never break

Platform Partner unstop

SOLUTION ARCHITECTURE & DATA FLOW

AI proposes, rules decide, documents are read and never stored

CHANNELS

Mobile web / PWA
4 languages, low-bandwidth

Voice
speech-to-text in hi-IN, mr-IN, ta-IN

WhatsApp link
campaigns, quote sharing

Partner / field app
same journey, assisted

→

UDYAM DIGITAL PLATFORM (NODE.JS API)

① Advisor: Udyam Saathi
Claude Opus 5.5 extracts business facts from free text (any language, identifiers redacted first) → slot-filling dialogue asks only what is missing (max 7 questions)

Rules engine
catalogue: city tier, min staff/sites, GSTIN, *requires_one_of*, segment budget guard

② Quote engine
term-based price within range, setup, 18% GST, add-on toggles, install ETA = slowest product

③ Smart KYC
consent gate → OCR (Tesseract) → field extraction → GSTIN checksum + OCR repair → registry lookups → 14 cross-document checks → decision

Mock registry APIs
GSTIN lookup (status: active / cancelled / suspended) · Udyam lookup · DigiLocker pull · e-sign OTP

④ Orders & tracker
per-product install plan, stage events, WhatsApp notifications, tracker locked by order ID + last 4 digits of mobile

⑤ Back office
hand-offs with full context, leads ranked by propensity model (logistic regression, AUC 0.71) + next best action

Data layer
consent ledger (versioned) · orders (hashed mobile) · no document images · masked logs

→

ACCEL SYSTEMS

CRM / lead store
attribution to partner by PIN code

Feasibility + provisioning
fibre check, SIM, router, CCTV kits

Field force & partners
survey, install, assisted closes

One bill · 121 support
single account for all products

TRUST · DPDP ACT 2023 · PEOPLE

Privacy by design, and a journey that feeds partners

Data privacy & security choices

Consent	Plain-language notice in the owner's language before KYC: what, why, how long, rights. KYC consent is required; WhatsApp updates and marketing are separate, and marketing is off by default. Versioned and timestamped in a consent ledger.
Purpose limitation	KYC data is used only for verification and activation. The advisor's profile never enters the KYC record; the propensity model uses no names or identifiers.
Data minimisation	Documents are OCR'd in memory and the image is discarded straight away. Only the extracted fields are kept, and those are dropped once the order is placed. GSTIN, Udyam no., phone and email are **redacted before any text reaches the AI model**.
Masking	GSTIN 27XXXXXXXXXU1ZL, Udyam XXXX547, IDs, names and phones are masked in the UI, the back office and the logs (automatic log scrubber). Mobile numbers are stored as a hash plus the last 4 digits.
Retention & rights	Verified details are kept for the contract plus the statutory period. A one-tap "Delete my KYC data" button (right to erasure) and a grievance officer contact sit on the consent screen.
Security	Image-only uploads up to 5 MB, security headers, back office behind a role key (SSO/RBAC in production), sessions expire after 2 h idle, encryption at rest and in transit in production.

Field force & channel partners

- **Assist, don't chase:** "Talk to an expert" creates a hand-off with the full profile and quote, so a partner never asks the same questions twice
- **Partners keep the commission** on digital closes in their PIN codes, so the app is their lead engine, not a competitor
- **Call list by propensity × value:** field sales only for multi-site, manufacturers and high-value drops
- **Partners own the last mile:** site survey, installation and the first-week check-in; the tracker shows their progress live

KYC answer quality on the specimen pack

Blur/unreadable (K02, K04) · cancelled GSTIN + blank Udyam no. (K01) · GSTIN typo caught by checksum + nearest registry match (K06, K10) · legal-name mismatch (K07) · bill older than 90 days (K11) · "Owner" as signatory for LLP/Pvt Ltd (K05, K10, K11) · 4 clean files approved in under a minute.

SUCCESS METRICS · ROLLOUT · RISKS

Target: 12% lead-to-live in 6 months, at half the acquisition cost

METRIC	Q1 BASELINE	6-MONTH TARGET	LEVER
Lead → activation	7.4%	**12%**	no-visit discovery, instant quote
Time to activate	17.6 days	**≤ 7 days**	KYC in minutes, parallel installs
Blended CAC / activation	₹15,053	**≤ ₹7,500**	digital-first, field sales for high value only
Status chases / customer	3.0	**< 1**	tracker + WhatsApp updates
6-month churn	15.2%	**< 10%**	right-sized bundles, fewer chases

Value at target on one quarter's 5,000 leads: +232 activations × ₹6,900 median bundle ≈ **₹1.9 crore new ARR per quarter**, plus ≈ ₹28 lakh of acquisition cost saved on today's 368 activations. Guardrail metrics: KYC first-pass rate, NPS, partner share of closes.

Rollout

0–3 m	**Pilot:** professional offices in Pune, Delhi, Nagpur and Jaipur; English + Hindi + Marathi; A/B against field sales
3–6 m	**Micro digital-only** via WhatsApp + voice; Tamil, Telugu, Kannada, Bengali; partner commission on digital closes
6–12 m	**All 22 cities**; live GSTN/Udyam/DigiLocker APIs; multi-site assisted journey; propensity model retrained monthly

Risks & mitigation

- **AI suggests the wrong product** → rules engine is final, advisor scenario regression suite run on every change
- **KYC fraud / tampered docs** → registry match + checksum; manual review queue on any fail
- **Partner pushback** → PIN-code attribution and commission on digital closes
- **Fibre not feasible** → auto-switch to 5G AirFiber, feasibility check before payment
